Tines

10	R100-3625	100-3625	Alloy Machined Side-Eject Tine - .375MT x 4.000L x .350OD	8	8.90	
----	------------------	----------	---	---	-------------	--

Detail Description: Alloy Machined Side-Eject tines remove a soil core which quickly exits the side of the tine through a precision machined slot. This slot is designed to avoid "plugging" that can occur using hollow tubular tines (especially the smaller diameters) in heavy soil conditions. R&R manufactures a wide selection of these side-eject tines machined from special high-carbon alloy steel solid bar and heat treated to RC45-48 in our own heat treating facility. Very popular for the multiple tine holders which fit all greens aerators.:

10	R201632	108-9105	Alloy Machined Side-Eject Tine - .375MT x 4.500L x .450OD	8	8.90

Very popular for the multiple tine holders which fit all greens aerators.:

11	R100-3622	100-3622	Alloy Solid Tine - .375MT x 5.000L x .375OD	8	5.95	
----	------------------	----------	---	---	-------------	--

Detail Description: Alloy Solid Tines aerate without the work of cleaning up the mess of cores and debris left behind with conventional core aerating. R&R Solid Tines are manufactured from a special high-carbon steel bar and heat treated to RC45-48 in our own heat treatment facility. They are available in all standard sizes but are especially popular in the smaller diameters for aerating in the summer months to relieve the stress on greens by allowing water, air and nutrients to easily flow into the root zone. With the combination of small holes and no cores, play can be resumed immediately.:

11	R108-9233	108-9233	Alloy Solid Tine - .375MT x 4.500L x .350OD	8	5.75
