

Underhill Anchor For 1-1/2in Quick Couplers

RG2721

Details

Prevent quick coupler valves from loosening inside the valve box. The Claw attaches to the base of the quick coupler valve in the valve box with 90 degree restraint tines embedded deep in the soil below the quick coupler then securely attached to the base to provide resistance to rotational, vertical and horizontal motion. Ideal for soggy and less stable soil near the surface. Installs without removing valve or valve box with no cutting required..
