

Sprinkler Head Hose Adapter 1" Npsh - to Fit Toro 730/830 RG900USR-1T

Details

Create a hose connection by converting a sprinkler head into an instant hose adapter or quick coupler. The PVC braided hose constructed of stainless steel reinforced clear poly braid with 1" NPSH threads rotates 360 degrees supporting movement in any direction. This flexible hose prevents tension, eliminating typical damage that may sometimes occur. Designed for hand watering localized dry spots, equipment washing or any hose application where only a sprinkler head exists. This adapts the sprinkler head to create the hose connection you need. Full assembly.
