

Leemco Male Adapter - 2.5 Bell x 2 Mpt

Restrained

RGLRF-21MA

Details

By restraining joints, the thrust force is confined to the pipeline which is no longer dependent on soil composition, compactness and saturation. With the Leemco restrained fittings, connections can be made in the shortest possible time. There is no need to wait for concrete trucks to arrive or long waits for concrete to cure. The system can be pressurized as soon as the joints are tightened. Repairs can be made with the trench soaked. The Leemco restrained fittings are designed to get a system in operation in the least amount of time and effort. Advanced Design Features...Leemco Self-Restrained fittings have blunt cast serrations which are specifically designed for PVC or HDPE plastic pipe. These non-machined serrations will not damage the plastic pipe surface and have a fused epoxy finish to protect against corrosive soil conditions.
