

Underhill Magnum UltraMax Turbo Shift Nozzle - 3/4in FHT - High Volume RGNG550-DFH-75

Details

The Magnum UltraMax Turbo Shift High Volume Nozzle is made with firefighter quality for professionals in any field. These dual variable flow, multi-function nozzles can be shifted from light fog and low volume to a high volume jet stream and fan pattern and are virtually indestructible and leak proof. The outstanding distribution patterns make these nozzles excel in high demand areas like golf greens and tees, infield conditioning, dry, patchy turf, equipment clean-ups and stadium washdowns. Constructed of aircraft aluminum, stainless steel and TPR rubber with a heavy-duty ball valve, push-pull on/off control handle. Firefighter Grip for two-handed operation or Pistol Grip handle for comfortable, extended use, sold separately. The Turbo Shift models provide two distinct GPM ranges. The High Volume Turbo Shift Model opens with 12-17 GPM (45-64 L/min). Turbo Shifts to 20-43 GPM (76-163 L/min). 600 PSI working pressure. 3/4in FHT inlet. Made in the U.S.A.
