

Underhill Magnum UltraMax Turbo Shift Nozzle - 3/4in FHT - Low Volume

RGNG550-DFL-75

Details

The Magnum UltraMax Turbo Shift Low Volume Nozzle is made with firefighter quality for professionals in any field. These dual variable flow, multi-function nozzles can be shifted from light coverage to a higher volume fog, jet stream or fan pattern and are virtually indestructible and leak proof. The outstanding distribution patterns make these nozzles excel in high demand areas like golf greens and tees, infield conditioning, dry, patchy turf, equipment clean-ups and stadium washdowns. Constructed of aircraft aluminum, stainless steel and TPR rubber with a heavy-duty ball valve, push-pull on/off control handle. Firefighter Grip for two-handed operation or Pistol Grip handle for comfortable, extended use, sold separately. The Turbo Shift models provide two distinct GPM ranges. The Low Volume Turbo Shift Model opens with 7-12 GPM (27-45 L/min). Turbo Shifts to 14-17 GPM (53-64 L/min). 600 PSI working pressure. 3/4in FHT inlet. Made in the U.S.A.
