

A Quick and Flexible Solution to Dripline Headers. The QF Dripline Header is a patent pending product that is the landscape industry's first pre-fabricated header for dripline installations. A Quick and Flexible replacement for a site-built header, the QF Dripline Header saves time and labor expense. Using a proprietary blend of polyethylene, similar to Rain Bird's XF Series Dripline, the QF Dripline header allows installers to simply roll out the header and attach the dripline at guaranteed 12" or 18" spacing. Eliminating the need for measuring, cutting, gluing and taping, the QF Dripline Header saves time and money, making projects more profitable.

- The QF Dripline Header elbows rotate 360 degrees and incorporate a protective ring, preventing damage and ensuring a proper seal.
- The rotating barb manages trenching misalignment. Move left or right to accommodate the dripline - no need to re-trench.
- Elbows utilize the same design as Rain Bird's popular XFF Fitting requiring 50% less insertion force, and are compatible with the XFF Fittings Tool.
- The ring also provides leverage to make attaching the dripline easier.
