

Drum Vent, Brass

RJ08101

Details

Drums of flammable liquids require venting to relieve pressure build-up due to heat and also prevent creation of a vacuum when liquid is being drained off or drum is subjected to sudden cooling. Justrite Drum Vents provide automatic pressure relief. Operating valve opens at five psig internal pressure in normal service. Vacuum relief is manual or automatic depending on the model and permits four or more gpm flow through a standard .75" faucet. All vents include a flame arrester for added safety.

Specifications

Manufacturer	Justrite
Material	Brass
