

Atom Wire Brush Edger Blade

RSG49000

Details

The Wire Brush Wheel is specially designed to edge along fences, curbs or asphalt, in concrete and brick seams, or paver-covered areas. The wire brush advantage is speed, with the forward rotation of the brush consistently pulling the edger along. The stiffness of the brush ensures a clean, crisp edge with 25-40 miles of edging. Wheelbarrow design, with the weight on the front wheel, makes it easy to use since the driver is not carrying the weight. Use with Atom RSG7000 Cart Path Edger.

- Designed to edge along fences, curbs or asphalt, in concrete or brick seams, or paver-covered areas
- Stiff brush assures clean, crisp edge
- Edges 25-40 mils
- Wheelbarrow design with weight on front wheel
