

Woodbay FDS 9200 Turf Dethatcher

RWB9200

Details

Rake thatch on natural grass and relieve compaction allowing water, air and fertilizer to penetrate the root zone using lightweight, flexible, spring-loaded tines. Built for high-speed dethatch and turf preparation for overseeding, aerating and leveling infield materials. The 92" operating width makes it possible to complete an entire NFL football field in less than an hour. Easy mount, 3-point hitch. Four free-floating sections easily spread top dressing. Hardened, vibrating steel tines are flexible enough to bend, not break, while effectively loosening thatch.

Specifications

Manufacturer	Woodbay Turf Technologies
Application Width	92 in (234cm)
