

Elvex Airspecs Safety Glasses/Goggles - Stainless Steel Mesh "Lens"

R7087M

Details

AirSpecs are designed with wire stainless steel mesh "lenses" to protect eyes while closely working around leaves, twigs and small tree branches. This allows air to freely pass through the frame for comfortable, non-fogging protection. A wrap around frame design with EVA foam face seal provides excellent eye protection for long lasting durability. Features include an angle adjustment temple to fit most faces and adjustable elastic fabric headband. The black anodized coated steel mesh lens greatly reduces hazardous reflections and 60% glare while working. Will not scratch or fog. Black stainless steel mesh lens, EVA foam seal on black frame, adjustable elastic fabric strap.

- Black anodized stainless steel mesh lens
- Black wrap around frame with EVA foam face seal
- Ideal for landscapers, arborists, fruit, crop personnel
- Adjustable elastic fabric headband
- 0.45 mm stainless steel mesh "lenses" with 0.8 mm openings provides limited hazard protection and air flow but allows air to freely pass through for comfortable non-fogging protection
- Reduces glare
- Meets ANSI Z87.1 for basic impact (1in ball drop) protection
