

Underhill Spray Head and Rotor Removal Tool Including Wrench

RGA-EO-SRT-RS

Details

An all-in-one tool to remove and replace all brand major gear drive rotors (3/4in inlet) and spray heads (1/2in inlet) including Hunter, RainBird, Toro, K-Rain, Introl, Weathermatic, Hydro-Rain and Orbit, with no digging and no damage to turf while saving time and money. The EasyOut 2in1 can complete two additional tasks for spray head sprinklers. Also, cap off supply line to sprinkler using optional 1/2in EasyCap Fitting. Plus, convert your sprinkler to a drip system. This all-in-one tool is designed to replace a standard sprinkler and raise the rotor/spray head sprinklers when used with riser sprinkler, sold separately. Includes a Torque Wrench assist and Telescoping Rod to minimize dirt from entering fitting and guides sprinkler body. Works with rotors and spray head sprinklers. Made of heavy duty precision engineered material.
